PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on Product Engineer experience and a strong interest in AI product management. Combines software development, product thinking, problem framing, and user-centered design to turn real-world problems into practical digital products. Currently developing product management skills through an AI Product Manager course at Product Space.

EXPERIENCE

Product Engineer *Independent Product Builder / Projects* **2025 – Present**

- Contributed to product development by translating requirements and user problems into practical software solutions.
- Worked across product and engineering tasks, connecting product goals with implementation decisions and user needs.
- Applied development, testing, iteration, and problem-solving to improve product functionality and usability.
- Collaborated on product ideas and technical execution while building hands-on product engineering experience.

EDUCATION

B.E. Computer Science and Engineering
2nd Year Undergraduate **2025 – 2029**

TECHNICAL & PRODUCT SKILLS

Programming: C (Intermediate), Python

Product: Product Thinking, Problem Solving, User-Centered Product Development

AI: Artificial Intelligence, AI Product Concepts, AI Product Management

Development & Tools: React, Next.js, Node.js, Firebase, OpenAI, Figma

PRODUCT MANAGEMENT LEARNING

AI Product Manager Course — Product Space **Active**

Developing practical knowledge of product discovery, problem framing, user needs, AI product concepts, prioritization, and product development workflows.

SELECTED PROJECTS

e-PRAMAAN · AI / Product / Software GitHub | Live Demo

AI-powered procurement compliance verification platform for GeM. Engineered hybrid OCR document layout parser paired with deterministic statutory rule validation (GSTIN, MCA CIN, MSME Udyam) to eliminate hallucination risks, cutting review cycle time by >70%.

Technologies: React, TypeScript, Python/FastAPI, Document Intelligence OCR, Statutory Rule Engine, Vector Embeddings.

RELEVANT COURSEWORK

Data Structures · Algorithms · Object-Oriented Programming · Database Management · Discrete Mathematics · Computer Science Fundamentals

CORE STRENGTHS

Problem Solving · Product Thinking · User-Centered Thinking · AI & Technology Exploration · Communication · Continuous Learning · Practical Project Building
